**TMS TRUNK STATUS
TABLE**

The diagram shows a table titled 'TMS TRUNK STATUS TABLE' with a reference number 110 pointing to the entire table. The table has six columns: 'Gateway', 'Trunk', 'Provisioned Link', 'Bandwidth', 'Used', and 'Available'. The 'Trunk' column is labeled with reference number 112. The 'Provisioned Link' column is labeled with reference number 114. The 'Bandwidth' column is labeled with reference number 116. The 'Used' column is labeled with reference number 122. The 'Available' column is labeled with reference number 124. The table is divided into two main sections: 'GA' and 'GD'. The 'GA' section contains six rows (Aa to Ag) and the 'GD' section contains five rows (Db to Df). Each row lists a trunk identifier, a provisioned link, and the corresponding bandwidth, used, and available values.
